

WHO IS DIAG?

Democrats for an Informed Approach to Gender (DIAG) is a registered 501(c)(3) grassroots organization of liberal voters who know gender ideology and the “gender-affirming care” model are in direct opposition to core liberal values: protecting children and vulnerable adults from harm, upholding the rights of women and girls, following the scientific method, and promoting freedom of speech and thought.

DIAG is building a coalition of Democrats who are ready to challenge our party’s willful ignorance and silence regarding the known harms of sex trait modification and sex-denialism. We advocate for open, honest discussion untethered to divisive, tribal politics.

DIAG’S GOALS

- Restore the liberal values of open dialogue and evidence-based medical care.
- Demonstrate that countless Democrats are critical of medical interventions for gender distress, and that these criticisms are based on child safeguarding and science, not bigotry and ignorance.
- Increase our Democratic representatives’ understanding of gender ideology to shift their support away from experimental medical intervention toward exploratory therapy.
- Advocate for the rights of women and girls. Support the protection of female spaces, sports, honors, and opportunities.
- Increase public awareness and understanding of the recklessness of “gender affirming care” by providing accurate, evidence-based information.
